Milford LoadMax®

The Ultimate Roof Rack Support System

Milford have developed LoadMax®, the ultimate roof rack support system to reduce the risks and issues associated with utility vehicle owners using a canopy and roof rack system to carry materials and ladders.

Milford's LoadMax® provides maximum support for a wide range of common canopies and roof racks through its innovative mounting methods and versatile adjustment possibilities. This DIY universal roof rack support system suits most single and dual utility vehicles and allows owners to safely carry loads up to the vehicle's full load potential.

Features

- Eliminates Stress & Thermocycling Fractures to Canopies
- Tested & Rated to AS/NZS 1235 & ISO 11154
- Rapid DIY Fitment
- Full Articulation and Height Adjustment
- Rugged Construction
- Maximum Load Rating
- International Patents Applied & Pending
- Covered by Milford's Lifetime Warranty*

*T&Cs Apply. Visit website for details.

Milford LoadMax®

The Ultimate Roof Rack Support System

Infinite Articulation

Full rotational adjustability allows LoadMax® to adjust to all canopy profiles

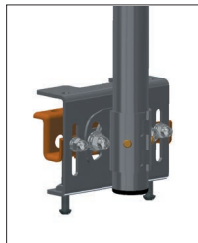

Unique Sure Grip Clamp

- Allows for full height adjustability
- Enables articulation to suit all roof profiles
- Provides maximum clamping effect

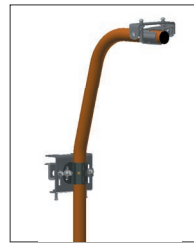

Unique Roof Rack Couplings

- Adjusts to all roof profiles
- Integrates with single & dual skin canopies
- Eliminates stress & thermocycling fractures to canopy
- Delivers maximum load rating

Precision Bed Rail Mount

- Allows for full adjustability
- Provides additional canopy clamping effect
- Delivers maximum load rating

Heavy Duty Uprights

- Large diameter 38mm tubular steel construction
- Multiple bend radii maximises cargo space
- Form fitting poly end caps

The versatile and adjustable configuration allows LoadMax® to adapt to most common tub bodies, canopy heights and roof racks. The heavy duty uprights included in the LoadMax® kit minimise chances of the canopy or tub cracking under pressure by providing a sturdy pillar of strength.

LoadMax® allows users to maximise their vehicle's maximum carrying capability whilst avoiding costly damage, repairs or the prospect of a heavy load falling from the vehicle amidst traffic.
